

AI governance for boards

A half-day session for police service board members on what AI is, where it goes wrong, and what to ask before it shapes a decision.

WHY NOW

New members join boards after the October 2026 municipal elections.

Required CSPA board training does not cover technology.

Ontario's Law Commission now calls for police AI policies.

THE HALF DAY

45 min **What AI is, and isn't**

Plain language. No math, no code.

45 min **Where it goes wrong**

Real cases of too much trust, and too little.

40 min **Human judgment is not automatic**

Automation bias and real oversight.

65 min **The board's toolkit**

Ontario's new rules, a policy framework, and a practice review of a sample AI proposal.

YOU LEAVE WITH

- Five questions for any AI proposal
- A model AI policy framework for your board
- A plan for a no-fault AI inventory
- Rules for the board's own AI use

Led by Scott Ramey

Former fire and paramedic chief officer; three decades in emergency services. PhD candidate in human factors, Systems Design Engineering, University of Waterloo.

Vendor-neutral; no products recommended. Independent of Police Governance Ontario.

LENGTH

Half day, 3.5 hours

FORMAT

In person or online

FEE

On request
